

1st Five eHealth Curbside Consultation PCP Guide

Do you have questions or concerns related to behavioral health, mental health development or growth and nutrition of your patients birth to 5 years?

eHealth Curbside Consultation is a free service that connects PCPs with a specialist via telephone to consult on issues of concern regarding specific patient cases or general topics related to diet and nutrition and psychiatric needs of children birth to 5 years.

Psychiatric Consultation

- ◆ Review behavioral health and psychiatric symptoms and concerns
- ◆ Provide information on therapeutic interventions and therapies for children 0-5
- ◆ Provide information on mental health resources for PCPs

Nutrition Consultation

- ◆ Offer resources to share with families to help address diet and nutrition
- ◆ Offer guidance on new pediatric malnutrition standards and monitoring growth
- ◆ Discuss interventions that can be used in clinic to help families address feeding difficulties.
