

1st Five Medical Consultant Team

**The 1st Five Medical Consultant Team is here to support you
in caring for the families you serve.**

Colleagues work together to build new skills, share ideas, teach one another, and solve problems.

Medical consultants offer peer coaching and educational presentations to Iowa's 1st Five Sites. There is no cost to providers to participate in these services.

Peer Coaching: Incorporating Screening Tools

The 1st Five Medical Consultant Team is made up of providers who specialize in implementing evidence-based screening tools into well-child visits.

Peer coaching provides access to colleagues who are routinely doing developmental surveillance and screening in their own clinics and are well-versed in the challenges that implementation can pose to different practices.

They are here to offer support, help address questions and challenges as they arise, and assist with:

- ◆ Workflow
- ◆ Billing to optimize reimbursement
- ◆ Realistic implementation of screening tools into a busy office setting

Educational Presentations

On-site presentations to primary care providers on a variety of topics including:

- ◆ Early Brain Development
- ◆ Adverse Childhood Experiences
- ◆ Autism Spectrum Disorder

1st Five webinar series:

- ◆ Learn about issues impacting healthy mental development of children
- ◆ Earn continuing education credits

Department of
Family Medicine
University of Iowa

Meredith Fishbane-Gordon, M.D.
Clinical Assistant Professor
Department of
Pediatrics
University of Iowa

Cheryll Jones, ARNP, CPNP
Director of Policy and Advocacy
Health Services Coordinator
Ottumwa Regional Center
Child Health Specialty Clinics

1st Five Healthy Mental Development Initiative

1st Five Healthy Mental Development Initiative model encourages primary care providers to incorporate standardized surveillance and developmental screening tools into their well-child visits following the American Academy of Pediatrics-endorsed Bright Futures periodicity schedule.

You play a unique role in early identification and treatment of developmental issues.

You can identify your patients with or at risk for developmental delay early by integrating standardized tools routinely into your practice.

Surveillance- Use standardized surveillance:

- ◆ For every child birth to five
- ◆ At every well-child visit

Developmental Screening- Use a standardized developmental screening tool at:

- ◆ 9 months
- ◆ 18 months
- ◆ 24 and/or 30 months

1st Five is administered by the Iowa Department of Public Health. IDPH contracts with the University of Iowa Division of Child and Community Health to work with local 1st Five contractors related to primary care provider consultation services.
